SUMMARY

Computer Science student specializing in Software Engineering, with hands-on experience building full-stack web applications and cross-platform API integrations. Currently migrating a clinic network's legacy VB.NET system to ASP.NET Core MVC and SQL Server, and previously built a WhatsApp/WeChat messaging bridge. Comfortable across the stack, from ASP.NET/C# services to React and Flutter front ends. Open to internship opportunities.

WORK EXPERIENCE

PT. Batavia Satu **[July 2026 – Present]**

Full Stack Engineer (Part-Time)

- Built an enterprise purchase-order management web application end to end (ASP.NET/C# backend, React front end), including supplier and store-selection workflows, dynamic edit forms, and database repositories.
- Designed and built a messaging bridge connecting the internal system to WhatsApp and WeChat for automated, cross-platform notifications.
- Own the CRM package of a legacy migration for a clinic network, moving VB.NET WebForms/DevExpress pages to ASP.NET Core MVC with Dapper and SQL Server (loyalty, redemption orders, e-vouchers, service packages, SMS logs, patient photo gallery).
- Implement database transactions, audit trails, and soft delete on write actions, and match PDF/Excel/CSV exports to the legacy system.
- Analyze legacy VB.NET code to fix defects (e.g., a refund log writing duplicate rows) and use Claude Code to speed up analysis, implementation, and review.

PT. Cellbox **[July 2025 - August 2025]**

Full Stack Engineer (Internship)

- Worked on software infrastructure and databases using Microsoft SQL Server and Dapper ORM.
- Built and maintained internal website features and CRUD functionality for core business entities.

EDUCATION

Bina Nusantara University **[August 2024 – Present]**

Computer Science Undergraduate

- Specialization in Software Engineering.
- Joined 3 volunteer activities.

Sekolah SMA Kristen Gloria 2 Surabaya **[July 2021 - July 2024]**

PROJECTS

WhatsApp / WeChat Integration **we-chat-test.vercel.app**

Cross-Platform Messaging Bridge

- Built a unified inbox that merges WhatsApp and WeChat conversations into one dashboard, labelled by source, with inline contact renaming and file attachments.
- Built with a C#/.NET backend and a React front end using webhooks, deployed on Vercel.

InstaTags **tagsout.vercel.app**

Chrome Extension & Web App

- Built a Chrome extension and companion web app that generates ready-to-use Instagram hashtags from a photo, combining several image-analysis models into one tag list.
- Shipped both the browser extension and a standalone image-upload flow, with the web app deployed on Vercel.

ServiceHub **github.com/NP3215/ServiceHub**

Mobile App (Flutter)

- Built a Flutter/Dart app for finding and booking car workshops, with Google/Apple sign-in, workshop search and filters, and a three-step booking flow (service, date, time slot).

Setrum **github.com/NP3215/setrum**

Home Energy Dashboard

- Built the front end of an electricity monitoring dashboard in HTML, CSS, and JavaScript, with usage charts, a per-device list, bill estimation, and fault/outage notifications.

ADDITIONAL INFORMATION

Languages — C#, VB.NET (legacy code analysis), Dart, JavaScript, Python, Java, HTML, CSS
Frameworks — ASP.NET Core MVC, ASP.NET MVC, ASP.NET Web API, Razor, React, AngularJS, Flutter
Data — Microsoft SQL Server (T-SQL), MySQL, Dapper ORM, LINQ, PDF/Excel/CSV export
Tools — Git, TFVC, Visual Studio, Postman, Microsoft Azure, Claude Code (AI-assisted development)
Spoken Languages — Indonesian, English
