SUMMARY

Computer Science student focusing on Software Engineering, with hands-on experience building full-stack web applications, mobile apps, and cross-platform API integrations. Comfortable working across the stack — from ASP.NET/C# services to React and Flutter front ends — and shipping personal and internship projects from first commit to a live deployment.

WORK EXPERIENCE

PT. Batavia Satu

[July 2026 – Present]

Full Stack Engineer (Part-Time)

- Built an enterprise purchase-order management web application end to end, across an ASP.NET/C# backend and a React front end.
- Implemented supplier and store-selection workflows, dynamic edit forms, and the underlying database repositories.
- Designed and built a messaging bridge connecting the internal system to WhatsApp and WeChat for automated, cross-platform notifications.
- Worked across the stack, from backend services to front-end views, as part of a small engineering team.

PT. Cellbox

[July 2025 - August 2025]

Full Stack Engineer (Internship)

- Worked on software infrastructure and databases, including Microsoft SQL Server, using Dapper ORM for data access.
- Built and maintained web application features supporting the company's internal website
- Worked on CRUD functionalities for core business entities.

EDUCATION

Bina Nusantara University

[August 2024 – Present]

Computer Science Undergraduate

- Specialization in Software Engineering.
- Joined 3 volunteer activities.

Sekolah SMA Kristen Gloria 2 Surabaya

[July 2021 - July 2024]

PROJECTS

InstaTags

tagsout.vercel.app

Chrome Extension & Web App

- Built a Chrome extension and companion web app that generates ready-to-use Instagram hashtags from a photo, combining several image-analysis models into one tag list.
- Shipped both the browser extension and a standalone image-upload flow, with the web app deployed on Vercel.

WhatsApp / WeChat Integration

we-chat-test.vercel.app

Cross-Platform Messaging Bridge

- Built a unified inbox that merges WhatsApp and WeChat conversations into one dashboard, labelled by source, with inline contact renaming and file attachments.
- Built with a C#/.NET backend and a React front end, deployed on Vercel.

ADDITIONAL INFORMATION

Technical Skills — C#, JavaScript, Python, Java, HTML, CSS, ASP.NET MVC, ASP.NET Web API, AngularJS, Dapper ORM, LINQ, Microsoft SQL Server, MySQL, React, Flutter, Git

Languages — Indonesian, English
